

MEMORANDUM

DATE: January 31, 2012

TO: Illinois EPA, Bureau of Land Division File

FROM: Lance Range, Project Manager, Office of Site Evaluation, Illinois EPA *LR*

SUBJECT: Depth of Well

SITE NUMBER: LPC 085 813 5001 – Jo Daviess County
Bautsch-Gray Mine/Galena
ILD 000 508 088

On January 31, 2012, I conducted a telephone interview with the current resident of a property located adjacent to the Bautsch Gray Mine. This interview was to identify the depth of the drinking water well of that residence.

The current owner identified that the drinking water well is approximately 80 feet deep. This was discovered during the replacement of the pump of the well. During this replacement it was discovered that there were 4 lengths of PVC pipe each being 20 feet long which were all connected inside the well.
